

MANAN MAHESHWARI

Kanpur, Uttar Pradesh | +91-7355737805 | manan.street@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Full-Stack Software Engineer (Fresher) experienced in building production web applications with React.js, Next.js, TypeScript, and Python (FastAPI/ML), including AI-powered platforms with real-time pipelines and predictive models. Strong CS fundamentals in DSA, OOP, DBMS, and Operating Systems.

TECHNICAL SKILLS

Languages: C++, Python, JavaScript, TypeScript, SQL

Frontend & Backend: React.js, Next.js, Tailwind CSS, FastAPI, REST APIs, WebSockets

AI/ML & CS Fundamentals: Machine Learning (scikit-learn, Pandas), Computer Vision, DSA, OOP, DBMS, OS, Computer Networks

Tools & Platforms: Git, GitHub, Vercel, Supabase, PostgreSQL

PROJECTS

KumbhFlow – AI Crowd Intelligence Platform | *Next.js, TypeScript, FastAPI, WebSockets* ([GitHub](#))

- Built a full-stack crowd management platform with real-time density heatmaps and live WebSocket-based alerts for large-scale public events.
- Designed an ML-based prediction module forecasting crowd density 15–30 minutes ahead to power safety-optimized route recommendations.

CrisisIQ – AI Crisis Prediction Platform | *Next.js, FastAPI, Python, Machine Learning* ([GitHub](#))

- Built and deployed (Vercel) a full-stack platform combining live weather and news-sentiment data with an ML risk-scoring model for crisis prediction across Indian cities.
- Designed an end-to-end pipeline from external API ingestion to model scoring and an interactive intelligence dashboard.

ResumeAnalyzer Pro – AI Resume Analyzer & Job Matcher | *Python, SQL, AI APIs* ([GitHub](#))

- Built an AI-powered platform for automated PDF/DOCX resume parsing, ATS-style scoring, and job matching using SQL-backed pipelines and real job-listing APIs.
- Processed 100+ resumes with ~40% improved parsing efficiency; added AI-generated feedback and automatic cover-letter generation.

Deepfake Detector (Advanced) – AI Chrome Extension | *JavaScript, Computer Vision* ([GitHub](#))

- Built a Chrome extension performing real-time deepfake detection on video platforms (YouTube, TikTok, Instagram) using computer-vision heuristics — face warping, blink-rate, and lighting/texture analysis.
- Designed a confidence-scoring system with color-coded indicators and exportable reports, with all inference running client-side for privacy.

Packet Analyser – Deep Packet Inspection Engine | *C++, Multithreading, Networking* ([GitHub](#))

- Implemented a multi-threaded DPI engine in C++ for real-time traffic analysis and SNI-based domain classification.
- Designed a configurable packet-processing pipeline supporting traffic-blocking rules, demonstrating strong systems and networking fundamentals.

Nutan Industrial Pack – B2B Business Platform | *Next.js, TypeScript, Supabase, Tailwind CSS* ([GitHub](#))

- Developed a full-stack B2B platform for an industrial supplier with 500+ products, including dynamic product detail pages, category browsing, and SEO-optimized routing.
- Built a Supabase-backed admin dashboard for managing products, inquiries, and homepage content, with inquiry forms storing data directly to the database.

EDUCATION

VIT Bhopal University — B.Tech, Computer Science Engineering | CGPA: 8.61 | 2023–2027

Coursework: DSA, DBMS, OOP, OS, Computer Networks | Class 12 (ISC): 84% | Class 10 (ICSE): 94%

CERTIFICATIONS

Data Science Job Simulation (Forage) · Data Analysis with Python (freeCodeCamp) · Google Analytics (Google) · AWS Technical Essentials (AWS)
